ADVANCING MOTION

Forward Looking Statements

This presentation contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. All statements, other than statements of fact, that address activities, events or developments that we or our management intend, expect, project, believe or anticipate will or may occur in the future are forward-looking statements including without limitation our statements regarding inflationary pressure on Garrett’s business and management’s inflation mitigation strategies, financial results and financial conditions, industry trends and anticipated demand for our products, Garrett’s strategy, anticipated supply constraints, anticipated developments in emissions standards, trends including with respect to production volatility and volume, Garrett’s capital structure, new product development and capital deployment plans for the future including expected R&D expenditures, anticipated impacts of partnerships with third parties, and Garrett’s outlook for 2024. Although we believe forward-looking statements are based upon reasonable assumptions, such statements involve known and unknown risks, uncertainties, and other factors, which may cause the actual results or performance of Garrett to be materially different from any future results or performance expressed or implied by such forward-looking statements. Such risks and uncertainties include but are not limited to those described in our annual report on Form 10-K for the year ended December 31, 2023, as well as our other filings with the Securities and Exchange Commission, under the headings “Risk Factors” and “Cautionary Note Regarding Forward-Looking Statements.” You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this document. Forward-looking statements are not guarantees of future performance, and actual results, developments and business decisions may differ from those envisaged by our forward-looking statements.

Non-GAAP Financial Measures

This presentation includes the following Non-GAAP financial measures which are not calculated in accordance with generally accepted accounting principles in the United States (“GAAP”): constant currency sales growth, EBITDA, Adjusted EBITDA, Adjusted EBITDA margin, Adjusted free cash flow, and Adjusted free cash flow conversion. The Non-GAAP financial measures provided herein are adjusted for certain items as presented in the Appendix containing Non-GAAP Reconciliations and may not be directly comparable to similar measures used by other companies in our industry, as other companies may define such measures differently. Management believes that, when considered together with reported amounts, these measures are useful to investors and management in understanding our ongoing operations and analysis of ongoing operating trends. Garrett believes that the Non-GAAP measures presented herein are important indicators of operating performance because they exclude the effects of certain items, therefore making them more closely reflect our operational performance. These metrics should be considered in addition to, and not as replacements for, the most comparable GAAP measure. For additional information with respect to our Non-GAAP financial measures, see the Appendix to this presentation and our annual report on Form 10-K for the year ended December 31, 2023.

- Reaffirming full year 2024 outlook

¹ Reconciliations of Non-GAAP financial measures are included in Appendix

Expanding our Turbo Leadership in a Consolidating Industry

- Additional wins and launches of **gasoline variable nozzle technology** on **hybrid applications** in Europe, China and North America
- **New offerings in commercial vehicles**
 - Launched **alternative fuel applications** on growing segment of **Natural Gas heavy duty trucks in China**
- **Expanding in off-highway and industrials**
 - Secured **two new awards for power generation** applications in China, expanding our presence in the industrial space fueled by **data center growth**

Advancing Our Zero Emission Offerings that Deliver True Value to Our Customers

- **Two new series production awards for high-speed Fuel Cell Compressors** from the broadest portfolio of light weight **applications**
- Differentiated high speed **E-Powertrain** traction motor delivering the same power with smaller packaging and weight
 - Delivered and installed at **leading global OEM**
 - Transitioned from test bed to **vehicle testing**
- Revolutionary high power, light weight centrifugal **E-Cooling Compressors** for thermal management, enhancing fast charging capability and high load performance of BEVs
 - First samples delivered and customer testing ongoing

Focused on value creation

Industry Leadership

Continue to be #1 Turbo player and leader in a technology-driven industry; Still investing in new Turbo technology especially for hybrids; Expanding into industrial applications

Cash generation

Proven performance through business cycles; Framework of 60% adjusted free cash flow conversion¹ while funding R&D and returning cash to shareholders

Focused zero emission² strategy

Focused investments on differentiated technology solutions for our Fuel Cell Compressor, E-Powertrain and E-Cooling Compressor, targeting **\$1B annual zero emission² sales** by 2030

Tech differentiation

New **zero emission** offerings, addressing unmet customer needs; sustaining **high margins** through **differentiated technology** that is difficult for competitors to replicate

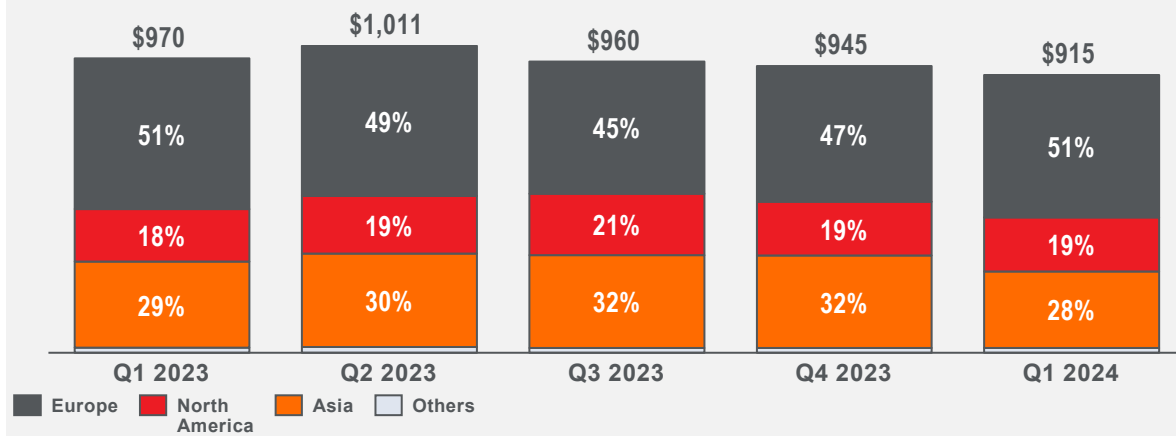

Talent & Culture

Experienced team, proven performance, strong culture of innovation centred on creating and delivering **breakthrough technology** at scale

We define constant currency sales growth as the year-over-year change in reported sales relative to the comparable period, excluding the impact on sales from foreign currency translation. This is the same definition we previously used for “organic sales growth”. We believe this measure is useful to investors and management in understanding our ongoing operations and in analysis of ongoing operating trends.
